

- 1) Confirm that you have the following tools installed:
  - Java Development Kit (JDK)
  - Eclipse for Java Developers\*
  - Node.js and npm (Node Package Manager)

\*It includes Maven integration.
- 2) Run Spring Boot on Eclipse by running FullstackWithMavenApplication.java  
Here you can see the API response in the browser: <http://localhost:8080/users/myPersonal/books>
- 3) Initialize the frontend in React with the following command (inside frontend-react-fullstack folder):  
npm start
- 4) Open the Application for managing your Personal Library: <http://localhost:3000/books>
